

NDMA Cyclone Response Protocol 2018

CYCLONE RESPONSE PROTOCOL 2018

1.1 Before Cyclone Season

- Identify cyclone shelter locations in your area
- Stock emergency supplies for at least 3 days
- Trim trees and secure loose objects around property
- Know evacuation routes to higher ground
- Keep battery-powered radio for updates

1.2 During Cyclone Warning

- Complete evacuation when ordered by authorities
- Stay away from windows and glass doors
- If in sturdy building, stay on lowest floor, interior room
- If evacuation not possible, go to cyclone shelter immediately
- Keep emergency kit and important documents ready

2.1 Safety Measures

- Stay indoors until authorities give all-clear
- Do not go outside during eye of cyclone - winds resume suddenly
- Avoid using candles - use flashlights instead
- Do not touch fallen power lines
- Stay away from flooded areas

2.2 After Cyclone

- Check for injuries and provide first aid
- Report damaged infrastructure
- Do not use contaminated water
- Be aware of landslides in hilly areas

3.1 Coastal Districts

- Puri, Khordha, and Cuttack are high-risk districts
- Cyclone shelters available at 500m+ elevation
- SDRF teams pre-positioned before cyclone landfall
- Community-based early warning system in place

3.2 Evacuation Protocol

- Follow numbered evacuation routes to shelters
- Carry only essential items and documents
- Register at shelter for tracking
- Do not return until all-clear announcement

4.1 Southwest Monsoon (June-September)

- Heavy rainfall expected in Western Ghats
- Landslide risk in hilly terrain
- River flooding common in low-lying areas
- Stay alert for red alerts from IMD

4.2 Emergency Contacts

- Kerala SDMA: 1070
- Police: 100
- Fire: 101
- Ambulance: 108
