

NDMA Medical Emergency Response Protocol

MEDICAL EMERGENCY RESPONSE PROTOCOL

1.1 First Aid Principles

- Ensure scene safety before approaching victim
- Call emergency services immediately for serious injuries
- Do not move person with suspected spinal injury
- Control bleeding with direct pressure
- Keep victim warm and calm

1.2 Cardiac Emergency

- Check for responsiveness and breathing
- Begin CPR immediately if no pulse: 30 compressions, 2 breaths
- Use AED if available
- Continue until emergency services arrive

1.3 Burn Treatment

- Cool burn with running water for 10-20 minutes
- Do not apply ice, butter, or ointments
- Cover with clean, non-stick dressing
- Do not break blisters
- Seek medical attention for large or deep burns

2.1 Crush Injuries

- Do not remove heavy objects from victim
- Provide oxygen if available
- Monitor for shock symptoms
- Prepare for possible cardiac arrest when object removed

2.2 Hypothermia

- Move victim to warm, dry location
- Remove wet clothing
- Warm victim gradually with blankets
- Do not rub extremities
- Provide warm fluids if conscious

2.3 Heat Stroke

- Move victim to cool area immediately
- Cool body with water and fans

- Do not give fluids if unconscious
- Monitor airway and breathing
- Emergency cooling required

3.1 Major Hospitals

- Government Medical College, Thiruvananthapuram: 600 beds
- Amrita Hospital, Kochi: 700 beds
- Medical College, Kozhikode: 500 beds
- AIIMS-like facility at Kottayam

3.2 Emergency Medical Teams

- NDRF medical units pre-positioned
- Mobile medical units for remote areas
- Telemedicine centers in each district
- Blood bank network across state
